Qualitas reports second quarter 2020 results

Mexico City, July 21st 2020- Qualitas Controladora, S.A.B. de C.V. ("Qualitas", "Q", or "the company") (BMV: Q*), announces its unaudited financial results for the second quarter ended June 30th, 2020.

Figures in this document are stated in millions of Mexican pesos except when otherwise specified and may vary due to rounding.

Highlights

- In spite of the pandemic, Qualitas has operated without interruption, fulfilling the obligations with the policyholders, and exceeding recommendations to safeguard the health of our employees, clients, and business partners.
- As a result of the economic and health crisis, our written premiums decreased 14.1% compared to 2Q19, remaining year to date practically at the same level as last year, with an increase of 0.3%. Earned premiums had a marginal growth of 0.7% during the quarter and 8.2% in cumulative terms.
- Since late March, a 10% discount in renewals has been given to our clients, implementing easy payment terms like 3, 6, and up to 12 months without interests, as well as extending our grace period for some of our fleets.
- Loss ratio during the quarter and YTD closed at 43.4% and 47.8% respectively. The lockdown measures drastically reduced the number of vehicles in the streets, and thus the number of accidents, benefiting the loss ratio of the quarter.
- Underwriting result reached \$2,565 million, up 122.3% or \$1,411 million vs same period year ago. The comprehensive financial income delivered \$659 million during the quarter, presenting a 6.3% growth vs 2Q19, although 44.8% or \$583 million less in accumulative terms.
- Quarterly net income amounted to \$2,237 million, \$937 million more than the same period of the previous year, reaching \$3,677 million during the first 6 months of the year, and the highest ever reported in the history of the company.
- EPS stand at \$15.82 that compares to \$8.69 at the end of June 2019. Net margin for the quarter was 31.5% and the 12 months Return on Equity stood at 46.7%, well above our long term objectives. P/E stand at 5.71 and P/BV stands at 2.22.
- During the second quarter of the year, Q* formally became part of the S&P/IPC, and was included in the S&P/BMV Dividend Index and the S&P/BMV Total México ESG Index, as a result of the ESG (Environment, Social, and Governance) actions taken by the company, as well as the increase in the stock's liquidity.
- During the complicated economic situation, Qualitas continued supporting 25 nonprofit organizations and doctors that are fighting against COVID19.

Total	7,094	8,256	(1,398)	(14.1%)	16,700	16,642	57	0.3%

Figures in million pesos.

Note: figures may vary due to consolidation effects.

During the second quarter, the total written premium was \$7,094 million, a decrease of 14.1% compared to 2Q19 driven by the economic shutdown to reduce the spread of covid19 which impacted not only the disposable income of our clients, but also new car sales in the country. The biggest impact was on the financial institutions segment, with a decline of 26.1%, followed by a decrease of 13.8% in our traditional business line.

Year to date, written premium remained practically at the same level as the same period last year, with an increase of 0.3%, which is relevant when taking in account the complicated national environment in the countries where we operate.

In spite of the circumstances, the foreign subsidiaries had an increase of 46.5% compared to the same period of the previous year, standing at \$707 million. In accumulated terms, we achieved \$1,295 million, which represents a 43.8% growth year over year. This performance goes in line with our strategy to accelerate their profitable growth.

Insured units

According to AMDA, new car sales in México decreased 54.5% during the 2Q20 with 139,768 sold units, which represents 167,742 less units than the same quarter last year. It is important to highlight April as the month with the biggest drop with 64.5%, as a result of the recently declared pandemic caused by COVID-19 and the economic shutdown to reduce its spread.

We closed the quarter with 4,213,483 insured units, which represents a growth of 2.5% or 102,373 units more vs 2Q19. However, due to the economic slowdown, and the impact on the written premiums, our number of insured units decreased 2.5% in comparison with the end of March 2020. In accumulated terms, at the end of this quarter, we have 0.3% less units than at the beginning of the year.

Note: figures in thousands of units.
 CAGR: Compound Annual Growth Rate of the last 5 years.

Qualitas' insured units are distributed as following:

BUSINESS LINE	2Q20	1Q20	Δ %	4Q19	Δ %
Mexico	4,070	4,180	(2.6%)	4,094	(0.6%)
<i>Automobiles</i>	2,753	2,834	(2.9%)	2,793	(1.5%)
<i>Trucks</i>	1,083	1,102	(1.7%)	1,067	1.5%
<i>Tourists</i>	93	97	(4.4%)	97	(4.3%)
<i>Motorcycles</i>	141	147	(3.9%)	138	2.7%
El Salvador	19	19	(3.1%)	20	(5.6%)
Costa Rica	62	65	(4.0%)	60	3.9%
USA	17	21	(17.9%)	19	(10.7%)
Perú	45	37	21.5%	31	44.9%
Insured vehicles	4,213	4,322	(2.5%)	4,224	(0.3%)

Earned premiums

During the second quarter, earned premiums increased 0.7%, which represents \$65 million more than the registered in the same period 2019. Earned premiums are higher than the written premiums due to the multiannual policies underwritten in previous years. In addition, the technical reserves release due to historically low loss ratio, have surpassed the constitution of new reserves.

Currently, our portfolio is composed by 81.1% annual policies and 18.9% multiannual policies, which compares with 71.7% and 28.3% respectively during the same period 3 years ago.

Annual policies allow to adjust tariffs between 3 and 4 times a year, which is extremely attractive in times like the ones we are living with volatility and uncertainty.

Acquisition cost & ratio

The net acquisition cost of the quarter was \$1,624, which represents a figure 8.4% lower than the recorded 2Q19. The acquisition ratio was 23.1%, a 146 bp increase vs 2Q19, and year to date 22.7%, 79 bp more than the same period 2019.

The growth in the YTD acquisition ratio, is explained by an increase in production bonuses for agents and commercial areas, link to the underwriting during the first quarter of 2020.

Loss cost & ratio

The lockdown measures and the slowdown of the economic activity in order to avoid the spread of COVID-19, benefited the company by reducing vehicle capacity and as a result the claims attended.

During the second quarter of the year, 204,158 claims were handled, this represents a 43.3% decrease when compared to the same period of 2019. In spite of the previously mentioned, we expect the number of claims to begin normalizing as soon as the lockdown measures start to be more flexible and the economy reopens.

Claims			
	2020	2019	Δ %
April	61,960	114,639	(46.0)%
May	69,327	124,502	(44.3)%
Jun	72,871	121,162	(39.9)%
Total	204,158	360,303	(43.3)%

Additionally, the decrease in robberies in México continues its positive trend benefiting the entire industry and therefore our company. According to the figures reported by OCRA, the theft of insured vehicles in México this quarter decreased 19.3% for the industry and 23.1% for Qualitas.

Similarly, Qualitas recovered 54% of its stolen units, which represents 4.6 percentage points above of what was recovered in 2Q19 and compared to the 44.8% of the industry's average.

Nonetheless, historically we have seen a correlation between the economic downturn and the increase in insecurity, which is why the economic crisis and the increase of unemployment could reverse the positive tendency seen during the past 18 months.

As of June 2020, the loss cost was \$3,779 million, which represents \$1,346 million less than the same quarter the previous year. The quarterly loss ratio was 43.4% and 47.8% during the first 6 months of the year, a decrease of 16 and 12 percentage points respectively, being the lowest one reported since the company was founded.

Operating cost & ratio

Operating expenses for the quarter stood at \$742 million, reaching an operating ratio of 10.5%, which means, 331 bp above what was reported in the same period of last year. In cumulative terms, the operating ratio stands at 7.8%, 222 bp more than the first half of 2019.

The reason for the increase is the fact that the Employee Profit Sharing provision, which is directly related to the company's earnings, had an increase of 94% when compared to 2Q19. If we excluded this account, the quarterly and YTD operating ratio would be 5.7% and 4.6% respectively.

Additionally, some of the actions taken to cope with the operative challenges due to the pandemic are included in the operating expenses. The actions taken include the expansion of our information systems and computer equipment to guarantee the proper function of the equipment while working remotely, and conditioning the working spaces to avoid spreading COVID-19 and take care of our employee's health.

Underwriting result

During this quarter, we had the lowest combined ratio since the company was founded, ending the quarter with a combined ratio of 77%. This represents a decrease of 11 percentage

points when compared to the same period of last year. Year to date, we had a combined ratio of 78.3% or a decrease of 925 bp year over year.

Underwriting result reached \$2,565 million during the quarter and \$4,383 during the year, which represents an increase of 122.3% and 108% respectively. These results were driven by the low loss and acquisition ratios during the quarter mentioned before.

The company registered an operating margin of 29.5%, which compares to the 13.4% registered the same period of last year.

Comprehensive financial income

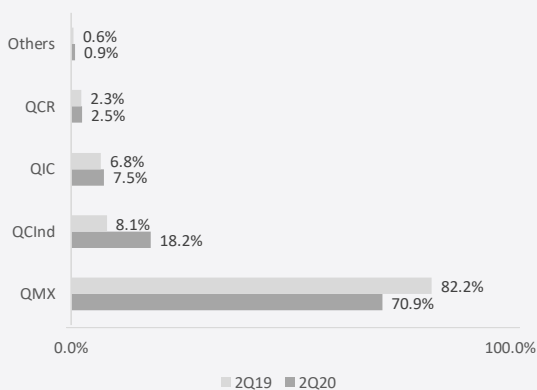

During the second quarter of 2020, the markets had a light improvement since the ending of the last quarter, even though continue with a high volatility linked to the evolution of the COVID-19 pandemic and the global economic recovery.

Additionally, México's Central Bank continued to reduce the interest rates, reducing the benchmark rate by 150bp, closing the quarter at 5.0%

The comprehensive financial income closed at \$659 million, which represents \$39 million more than the 2Q19. At the close of the first half of the year, the comprehensive financial income amounts to \$718 million, which still represents a 44.8% fall in comparison to the first half of last year.

The company maintains its low risk investment profile, increasing the percentage in fixed income, closing the quarter at 89.1% and the remaining 10% in equities. The return on investments was 7.0%, way above the average benchmark rate.

Portfolio by subsidiary

Total portfolio

Note: Rating differences in sovereign debt could vary between countries. Variations by exchange rate could generate differences. Others include our subsidiaries in El Salvador and Peru

Net income

Net profit for the quarter closed at \$2,237 million with a 72.1% increase when compared to the 2Q19, setting a new record for the company. Year to date, net profit reached \$3,677 a 47.7% growth when compared to 2Q19. This reaffirms Qualitas' capacity in creating value for all of its stakeholders despite the complicated environment that the industries and companies are going through.

The company registered a net margin of 31.5% and reported a 12-month ROE of 46.7%. The ROE is made up by an operating ROE OF 34.8% and a financial ROE of 12.0%

Subsidiaries

At the end of the 2Q20, the foreign insurance subsidiaries (geographical) and the non-insurance (vertical) subsidiaries represent 8.0% of the company's total underwriting, in line with our strategy to capitalize them and accelerate their profitable growth in the next years, and that compares to the 5.5% at the end of the first half of 2019.

Additionally, in spite of the complicated global situation, in accumulative terms the geographical and vertical subsidiaries had a growth of 45% year over year, achieving an underwriting of \$1,331 million. If we were to exclude the exchange rate depreciation, the geographical subsidiaries would have grown 26.1%.

	Written Premium					
	2Q20	2Q19	Δ%	6M20	6M19	Δ%
Q ES	21.4	33.7	(36.6%)	63.3	68.0	(6.9%)
Q CR	154.3	124.2	24.2%	324.8	250.4	29.7%
Q P	65.3	39.6	64.7%	109.1	56.0	94.7%
Q IC	466	285.0	63.5%	797.6	525.9	51.7%
Vertical	22.8	8.4	170.9%	35.7	18.3	95.1%
Total	729.8	491.0	48.6%	1,330.6	918.5	44.9%

Figures in million pesos.
Sales in the case of the vertical subsidiaries.

In regard of the non-insurance subsidiaries, the ones related to the insurance daily operation, in the aspects of providing spare parts and repairing crystals, continue to strengthen and become more representative in the company. Besides, they result in a decrease in cost and time efficiencies to for our clients.

CristaFacil, our subsidiary in charge of repairing windshields & crystals, is the #3 company in the country that installs the most amount of windshields, it also attends 75% of our claims related to crystals. As part of service efficiency, we are repairing windshield instead of substituting them, which represents 60% lower costs and an opportunity to continue reducing our costs.

Technical reserves

Technical reserves reached \$32,742 million, which represents a decrease of 3.9% compared to the end of second quarter last year.

The release of the reserves is due to a double effect, the decrease in underwriting makes the growth in earned premiums surpassed the constitution of new reserves linked to new policies, and at the same time, our historically low loss ratios impact our projection models which is why we constitute a smaller amount of reserves in these new policies.

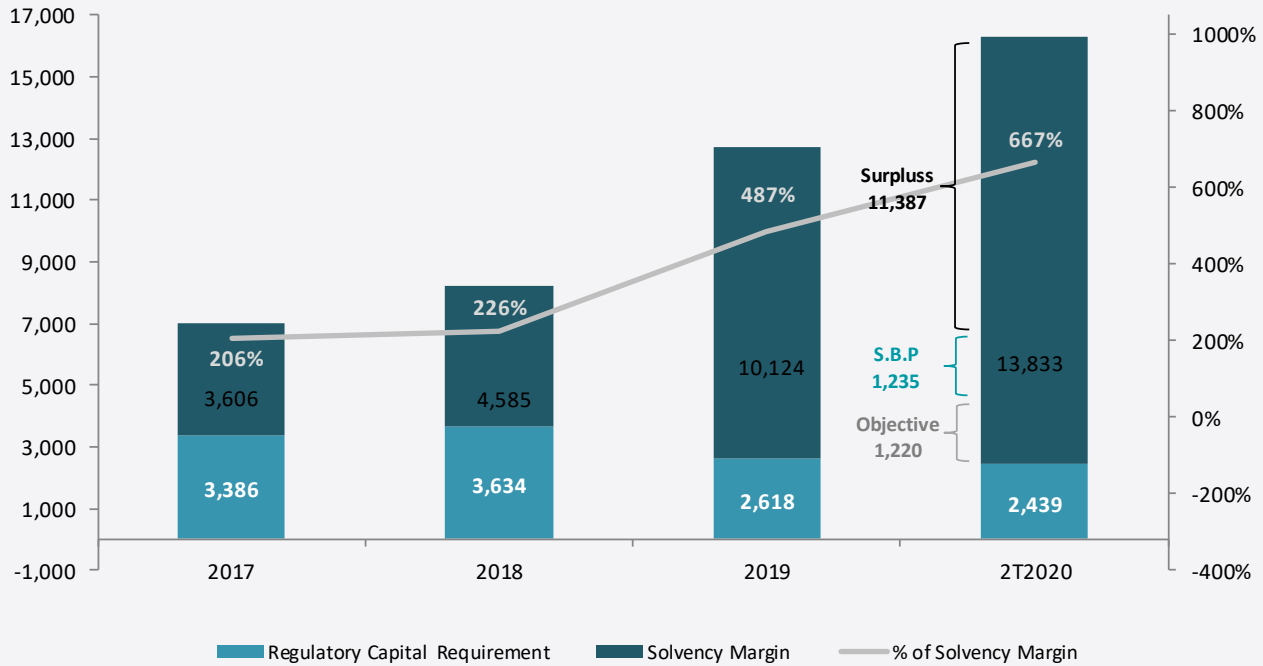

Solvency

The regulatory capital requirement stood at \$2,439 million at the end of the quarter with a solvency margin of \$13,833 million, this represents a percentage of solvency margin of 667%. This proves the strength the company has in order to guarantee its obligations and be prepared for unexpected situations caused by the pandemic or the economic crisis.

Additionally, during the 2Q20, the General Shareholders' Meeting, approved a dividend payment of \$1.70 pesos per share, which is equivalent to \$702.1 million and was payed on May 11th. A share buyback program for \$1,400 million was also approved. During the same meeting, the cancellation of 12 million shares bought back during 2019 was approved; we are still in the in the process, and after the cancellation, there will be 413 million shares outstanding.

It is important to highlight that for financial reasons, this report takes in consideration 413 million shares outstanding, even though these shares mentioned in the previous paragraph are still in process of being cancelled.

The objective of the new share buyback program is the purchase of 13 million additional shares (Q*) in order to reach 400 million shares outstanding in the upcoming years.

Note: The calculation of the required regulatory capital varies in the countries where Qualitas operates.

Stock performance Q*

During the second quarter of the year, Q* had a significant recovery when compared to the end of the 1Q20, with a return of 50.8%, closing the quarter at \$90.33 per share.

	Q*	IPC
2Q20	50.8%	9.2%
YTD	15.7%	(13.4%)

The daily average amount operated during the quarter was \$3.9 million dollars, representing an increase of 132% when compared to 2Q19. The company improved moving from position 28 to 25 in the marketability index.

	Traded Volume				Volume (MM USD)		
	2020	2019	Δ%		2020	2019	Δ%
June	846,456	772,788	9.5%	June	3.3	2.2	54.3%
May	1,033,314	747,058	38.3%	May	4.1	2.0	107.7%
April	1,237,714	348,258	255.4%	April	4.3	0.9	394.7%
2Q	1,032,945	628,623	64.3%	2Q	3.9	1.7	132.0%

During the 2Q20, Qualitas became part of the S&P/IPC, and was also included in the S&P/BMV Dividend Index and the S&P/BMV Total México ESG Index. The previously stated, is the result in the liquidity improvement, the consistency of dividend payment to our shareholders, and the actions taken to incorporate ESG criteria in the daily operation of the company.

In relation to our financial reasons, earnings per share closed at \$15.82 pesos, which represents an increase of 82.1% compared to the second quarter of 2019. The P/E ratio is 5.7, below other public insurance companies in Latin America and our historical average. The P/BV stands at 2.22.
